SUMMARY

Full stack web developer with 1 to 2 years of experience designing, building and shipping production web applications end to end. Comfortable owning a project from database schema to deployed UI, using Next.js, TypeScript and PostgreSQL/Supabase. Also owns and operates an independent car sales business, building its entire digital platform from the ground up, bringing real product ownership and business instinct alongside technical skill.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js (App Router, Turbopack), Tailwind CSS, React Hook Form, Zod, TanStack Query, HTML5/CSS

Backend: Node.js, Next.js API Routes / Route Handlers, REST API design

Database & Cloud: PostgreSQL, Supabase (Auth, Storage, Realtime, Row-Level Security), Neon Postgres, Drizzle ORM

DevOps & Tools: Git/GitHub, Vercel, Turborepo, Railway

Soft Skills: Collaboration, problem solving, product thinking, adaptability, self-directed learning, stakeholder communication

PROJECTS

Owner & Developer, PZ Autos (Pazogu Automobiles)

Independent car sales business, designed, built and run the entire digital operation

- Founded and personally operate an online car sales business, handling sourcing, sales and marketing alongside all engineering
- Designed and built the full marketing website with a public inventory showcase for car listings, photos and details
- Built a custom admin system for inventory and listing management, reusing and adapting the architecture from an earlier internal platform (Polanco Ops Hub)
- Own the full brand identity and product roadmap, including planned upgrades to the inventory and admin tooling

Full Stack Developer, Polanco Ops Hub (for Polanco Exotic Cars)

Internal operations platform for a luxury car dealership, built and shipped independently

- Designed and built an installable, mobile-first internal operations platform (PWA) intended to replace WhatsApp and Excel based workflows for a luxury car dealership
- Implemented a 6-stage lead pipeline with WhatsApp deep-linking and staleness tracking, and real-time inventory sync using Supabase real-time subscriptions
- Built an automated deal-sheet and proforma PDF generator that snapshots car data at time of sale for historical accuracy
- Designed a Postgres schema with Row-Level Security and dedicated public-facing database views to securely expose a public inventory showcase without a separate backend service
- Integrated the Twilio WhatsApp Business API and a live USD to NGN exchange rate feed into day-to-day dealership workflows

Full Stack Developer, Independent Projects

Freight/logistics platform and a simulated trading platform, built to explore new domains and patterns

- Building a freight/logistics platform (Next.js, TypeScript, Drizzle ORM, Neon Postgres) spanning a public marketing site, customer portal and admin app
- Built Sterling Capital Exchange, a simulated multi-asset (spot, forex, options) trading platform demo, shipping core trading, wallet and authentication features

EXPERIENCE

Content Manager & Social Media Manager, Page Innovations, Lagos

6 months

- Managed content and posting across TikTok, Facebook and Instagram, producing educational and relatable content on tech terms, developer life and web design
- Created and edited daily video content, incorporating graphics from an in-house designer
- Led ideation and execution of creative campaigns, from concept to final output

Videographer, Nigerian Film Industry (Nollywood)

- Worked as assistant camera technician on feature-length YouTube film content (60 to 90+ minutes), supporting shoot setup and occasionally operating camera

EDUCATION

B.Sc. Business Management, Imo State University

2018 - 2024
